NetFPGA Enthusiasts,

You already know that the NetFPGA implements a Gigabit NIC, a hardware-accelerated Internet router, a traffic generator, an OpenFlow switch, a NetFlow probe, and more. What else can it do? We invite you, NetFPGA Developers, to join the 1<sup>st</sup> NetFPGA Developers Workshop in Asia. The workshop to be held at KAIST (Korea Advanced Institute of Science and Technology) will allow you to show the world your latest project. Submit a paper to describe your project, prepare a demo, and come to Daejeon Metropolitan City of Korea in June of 2010 to demonstrate your work!

- **Paper Submission Deadline: 15 April 2010**
- **Paper Format: 4 ~ 8 Pages, ACM-style**
- **Demonstrations: Run on NetFPGA(s)**

**“What have you built with your NetFPGA Hardware?”**
